iBASX Smart Office Solutions - Solution sheet

Easy and affordable permanent workplace analytics

In today's rapidly evolving work landscape, adaptability is the key to success. As businesses embrace new ways of working, workplace occupancy and utilisation have, and will, change dynamically. Changing the workplace gives managers the opportunity to use space effectively, save costs and improve productivity. Therefore, the need for real-time data and actionable insights has never been greater.

That's why Measuremen is thrilled to introduce a groundbreaking workplace sensor proposition, designed to empower both employees and management with instant insights that seamlessly adapt to the changing dynamics of the modern workplace at a fraction of the costs.

iBASX Sensors As A Service

With our sensor solution, you don't have to buy expensive hardware but we'll be responsible for your sensors. All you need is a secure gateway to support privacy, eliminating the need for complex wiring or reliance on existing internet infrastructure.

We will install the right sensors for the right spaces and make sure they are working properly. All to support you in getting accurate workplace data to make important decisions.

Workplace Analytics

The Measuremen Portal is our workplace analytics platform in which we bring together data from the sensors in easy-to-analyse insights. In doing so, with the insights you are able to make better decisions about your workplace strategy.

The moment the first sensor is live you can access our dashboards that tell a story. Occupancy, utilisation, no shows and room bookings, with a blink of an eye you can view the graphs that help you to make key workplace decisions.

Key benefits

With iBASX Sensors you can optimise space, increase productivity, save costs and improve employee satisfaction. By tracking and analysing workspace usage, businesses can gain insights to improve resource allocation.

Cost savings

Sensors are a cost-effective way to collect occupancy data without the need for long-term technology purchases.

Data-driven decision-making

Sensors provide unbiased and trustworthy data. Decision-making is more accurate and better reflects the reality of your workplace.

Future proof

Prepare for the future of work by providing valuable data on how employees are using their work environment.

Employee experience

Create workplaces that are better suited, comfortable, collaborative, and efficient, leading to a better overall experience for your employees.

Office design

Optimise workplace management by recognising patterns and making predictions based on your workplace analytics.

Technical specifications

Long lasting batteries   Wireless technology   Cellular gateway   Privacy by design

Pricing

| €9 per sensor 6 months | €7 per sensor 12 months | €6 per sensor 18 months | €4 per sensor 36 months |

Starting from **100 sensors** | Installation between **€2500,-** and **€5000,-** | **One gateway** per 100 sensors
